

Accelerate SAP S/4HANA
transformations
with **msg.FIT**

Process Readiness: msg.FIT: new system analysis as a SaaS (Software as a Service) cloud solution under BTP to accelerate S/4HANA migrations

- **SAP system analysis** carried out in **2,500** companies since 2000.
 - 2000 - 2016: Used to **support release changes, re-standardizations, system optimizations and comparisons, re-documentations**, as well as **carve-in and carve-out** decisions of companies,
 - Additional focus since 2016 by msg: **Acceleration of S/4HANA migrations**
 - New development 2024/25: **SaaS cloud solution under BTP**
-
- msg.FIT **complements** the evaluations of the **SAP Readiness Check** and **SAP Signavio Process Insights** to ensure a well-founded decision on the S/4 HANA migration strategy!

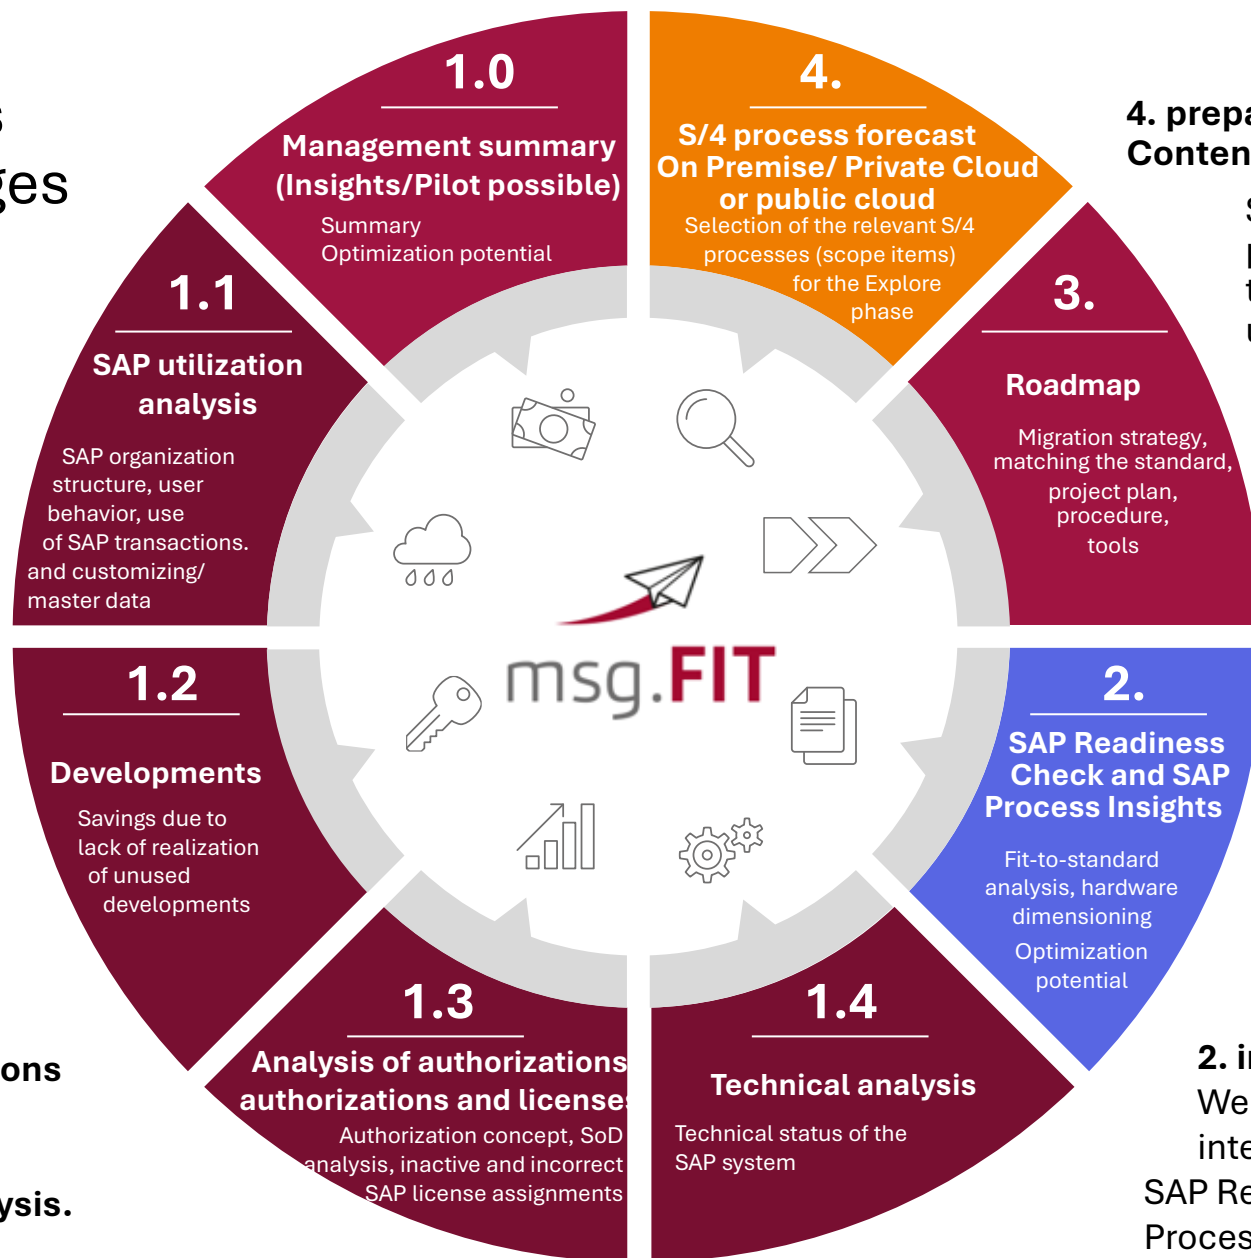

- msg.FIT reduces the effort involved in selecting SAP best practices (scope items) and thus **accelerates the S/4HANA migration!** This means that **SAP Signavio** and **SAP CALM** can be implemented more quickly.

msg.FIT, packages and their advantages

1.0 - 1.4 msg.FIT

is a service or a **SaaS (Software as a Service) vice**, developed under **BTP** and (soon) available again on the **SAP Marketplace** available again.

msg.FIT supplements these evaluations and analyzes possible structural **changes** (system organizational units and customizing), **fast utilization analysis of transactions and reports** (without restarting SCMON/SUSG log files), **Authorization and license analysis.**

4. preparation of Content for the exploration phase

Scoping of SAP best practice processes based on transaction and document utilization

document usage - **Preconfiguration of SAP Public Cloud.**

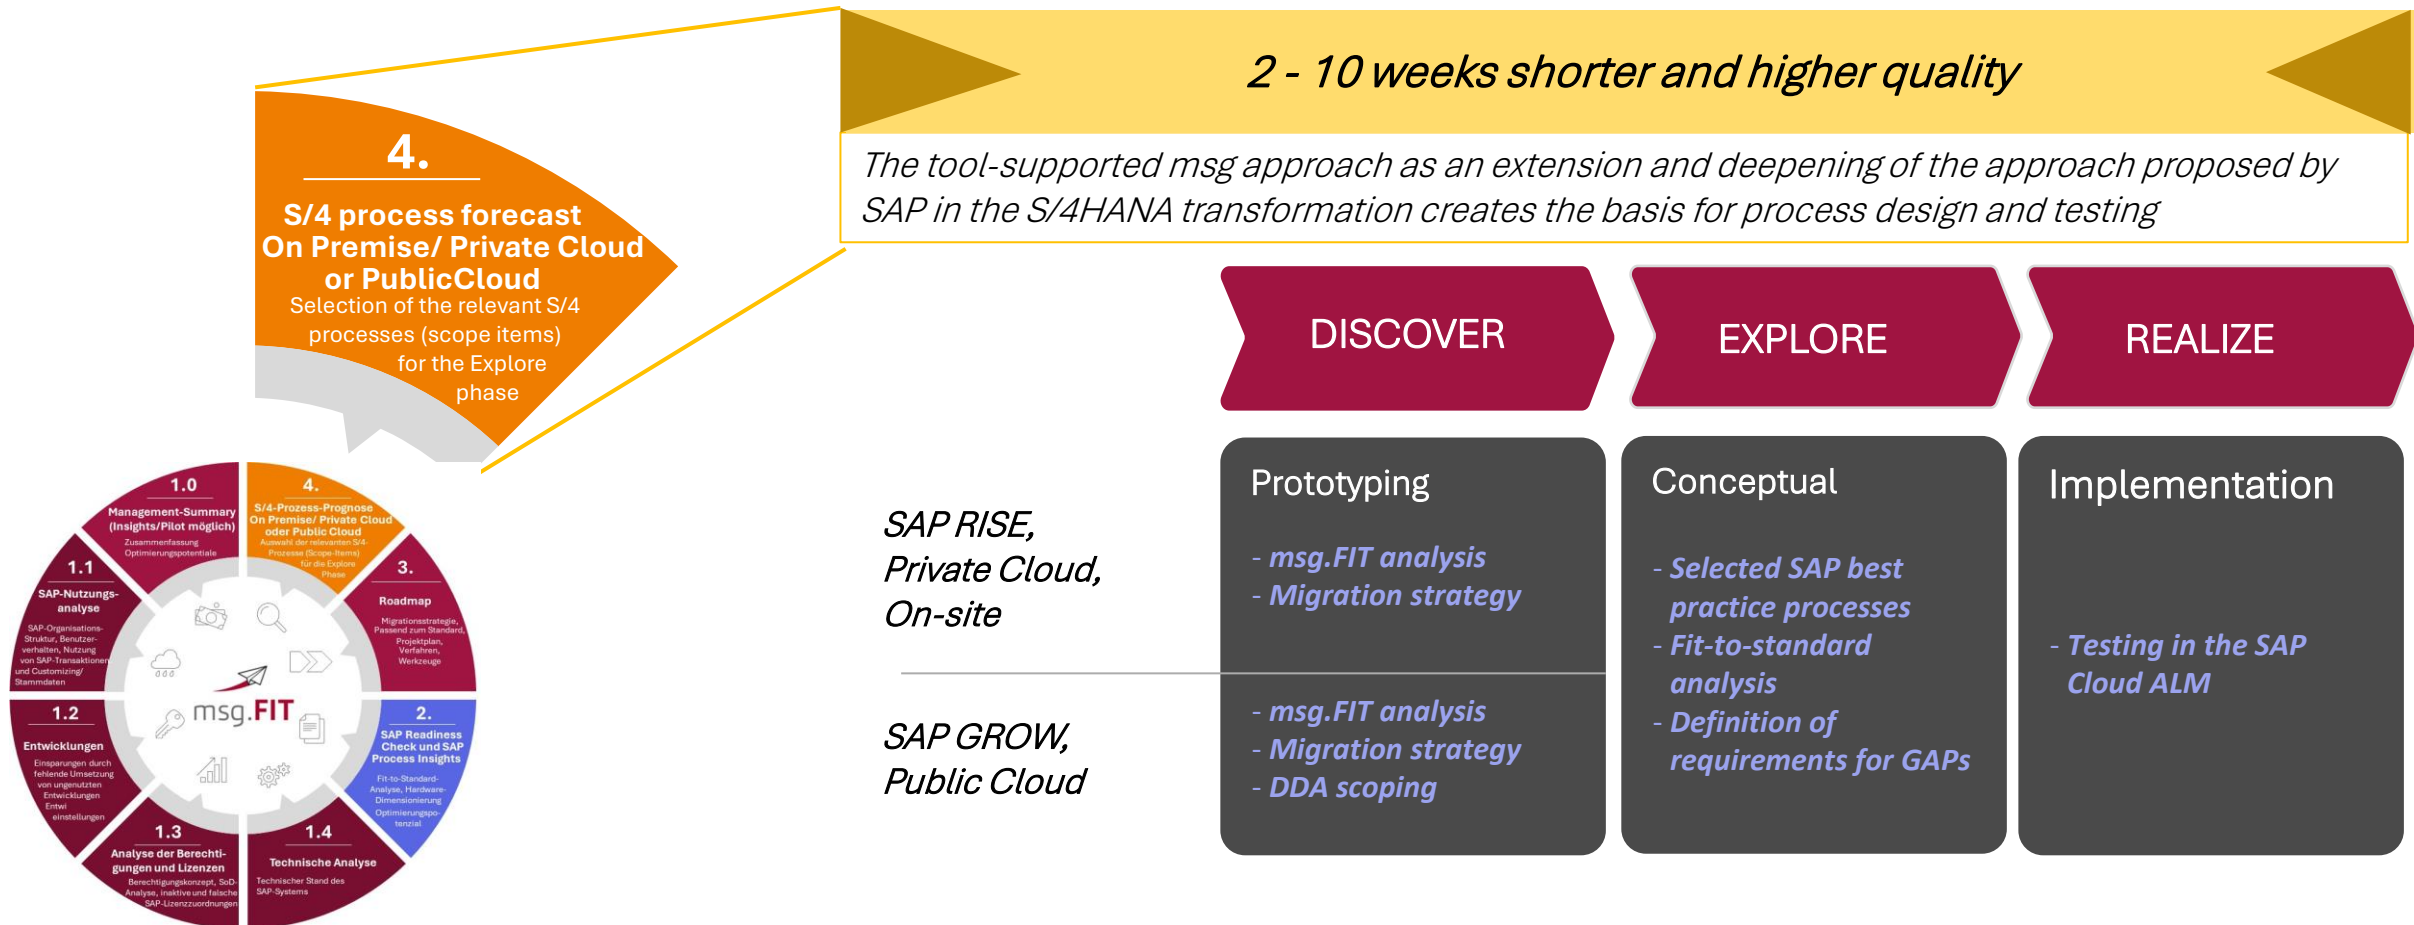

3. plan SAP migration strategy and S4/HANA project

Summary of the results, definition of a **migration strategy** and development of a **roadmap.**

2. interpretation

We conduct and support the interpretation of the SAP Readiness Check and Process Insights Discovery for our customers.

Process Readiness: msg.FIT: The results of msg.FIT prepare the Explore and Realize phase
